

# BUYERS GUIDE TO PUSH-TO-TALK FOR MOBILE WORKERS

Companies are increasingly using cloud-based Voice-over-IP solutions on mobile hand-held devices to enhance productivity.

Push-to-Talk (PTT) solutions enable workers to communicate quickly and efficiently within their organization at the touch of a button.

## Stay connected in high-noise environments with BlueParrott headsets

### Engineered for superior communication in high-noise environments

BlueParrott is a leader in intelligent, noise-cancelling audio devices, delivering superior call quality in high-noise environments.

\* Independently verified by CJS Labs San Francisco, CA  
 \*\* B250-XTS is not IP-rated. C300-XT is IP65-rated

- Up to 96% noise cancellation for superior communication\*
- Long lasting with up to 24-hour talk times
- Superior connectivity with range of up to 300ft/100m
- BlueParrott Button™ which can be used for Push-to-Talk
- IP54-rated protection against dust and water\*\*
- Multipoint pairing allows teams to seamlessly switch between two simultaneously connected devices
- Ergonomic designs for all-day comfort

## Why BlueParrott headsets?

BlueParrott products are engineered for superior communication in high-noise environments. Delivering crystal clear calls and high durability, BlueParrott headsets

are an invaluable communication tool for workers in professional driving, field service, retail operations or warehousing jobs who need to stay connected.

## Integration with enterprise mobile devices

BlueParrott headsets pair easily with all mobile devices using Bluetooth, while the unique BlueParrott Button™ delivers a seamless PTT experience. Voice messages from colleagues

are heard through the headset enabling users to continue working hands-free, while voice messages are sent by simply holding the headset's BlueParrott Button and talking.

## Take the next step

Our close partnerships with enterprise solution providers make BlueParrott headsets the ideal choice. Use the BlueParrott SDK for custom software integration.
