

Ready for your team, ready for Teams.

Level up your meetings with Jabra PanaCast and Speak 750.

Ready for better meetings

Huddling together is off the table for a little while, but that doesn't mean your small meeting rooms are out of commission. You just need high quality audio and video that's compatible with social distancing.

With Jabra PanaCast, 180° room coverage lets you get everyone in the picture while still maintaining a safe distance, while the rich simultaneous audio of the Jabra Speak 750 allows everyone to speak and be heard at the same time.

Give your Teams meetings the natural rhythm and flow of a real face-to-face meeting, with Jabra.

Always seen, always heard, always ready.

Ready to boost collaboration

Jabra PanaCast and Speak 750 integrate seamlessly with Microsoft Teams, for an experience that's fast, easy and simple from start to finish, enabling you to be more productive.

A dedicated Microsoft Teams button allows you to jump on a call or join a meeting without even breaking stride, while plug-and-play connectivity lets you focus on what matters, rather than wasting time on setup.

Be ready in an instant, with the simple touch of a button.

Ready to go... to Teams

When moving to a new platform, adoption is key. That's why Jabra products are certified for use with Microsoft Teams, guaranteeing the best experience and allowing your team to have more productive meetings.

Thanks to our in-depth integration, using Teams with a certified Jabra product makes the whole experience seamless, allowing you to really see the potential of the platform.

And the more your team use Teams and love it, the more they'll love Teams and use it.

1 or 2 wall-mounted screens

Jabra PanaCast should be mounted underneath or inbetween the screens, depending on eye level

Your laptop with Microsoft Teams

How to connect

Plug-and-play by bringing your laptop with Microsoft Teams.

Jabra Speak 750 should be placed in the center of the table

Certified for

Microsoft Teams
